Introduction to Quantum

with hands-on polarization and Qiskit (Python) labs

Today's Agenda:

1. What is Quantum & Why should you care?
2. Light is an Electromagnetic Wave
3. Measurements using polarization
4. What is Qiskit? (IBM's Open-Source Quantum Computing Platform)
5. Qiskit programming examples (using Python)
6. Summary – What is this really all about ?? **Would you like to learn more ??**

Donn Silberman
Mentor

What is Quantum & why should you care?

Things at the Atomic Scale are very different than at the human scale.

- The Quantum World underlies our modern civilization.
- And Quantum is about take humanity to the next level.
- You can help make it happen.

This web page has the article below and links to all the references.

Quantum Theory with Computer & Cyber Security Applications

Donn M. Silberman, Fellow of the OSSC & SPIE

Here are the first two paragraphs of the article. [Click on the link below to download the full article.](#)

PRE-QUANTUM MYSTERIES

ATOMIC SPECTRA

BLACKBODY RADIATION

The Map of Quantum Physics

We can discuss these another time. These topics relate to the fundamental Properties of Quantum Theory.

Today we will skip these and get to the heart of Quantum Computing And telecommunications.

Isaac Newton & the Prism

The Solar Spectrum with Fraunhofer Lines

Discrete spectral lines correspond to the energy levels of various atoms that are burning in the Sun.

The first, 1704, edition of *Opticks: or, a treatise of the reflexions, refractions, inflexions and colours of light.*

6 From Wikipedia: QUANTUM

In physics, a quantum is the minimum amount of any physical entity involved in an interaction. The fundamental notion that a physical property can be "quantized" is referred to as "the hypothesis of quantization".

[1] This means that the magnitude of the physical property can take on only **discrete values** consisting of integer multiples of one quantum.

Can't have $1\frac{1}{2}$ photons
Or $\frac{3}{4}$ of an electron

Graphic representation of an **electron (red O)** moving from one energy level to another, emitting or absorbing a **photon (Energy)** of light.

Samsung Display - Quantum Dot Physics

Single photon emitter

singlephoton.jpg (1000x1413) (b-cdn.net)

$$E = h\nu$$

frequency of radiation, sometimes written as f giving expression $E = hf$.
Quantum energy of a photon.
 $h = \text{Planck's constant} = 6.626 \times 10^{-34} \text{ Joule}\cdot\text{sec} = 4.136 \times 10^{-15} \text{ eV}\cdot\text{s}$

$$E = mc^2$$

[History of the transistor – Wikipedia](#) “After WWII, Shockley decided to attempt the building of a triode-like semiconductor device. He secured funding and lab space, and went to work on the problem with Bardeen and Brattain. John Bardeen eventually developed **a new branch of quantum mechanics known as surface physics** to account for the "odd" behavior they saw, and Bardeen and Walter Brattain eventually succeeded in building a working device.”

The Transistor

How does your cell phone information get from your phone to another person's phone??

HYBRID CURRICULUM IN ADVANCED OPTICS, SPECTROSCOPY, AND QUANTUM TECHNOLOGIES FOR TECHNICIANS

Be Laser-Focused

LaserTech is the use of lasers, cameras, lenses, mirrors, sensors, displays, fiber optics, and other technical devices that interact with light.

- ✓ Earn skills to be immediately hired as a technician
- ✓ Be prepared for success in a university engineering program
- ✓ Advance your career by mastering more technically demanding skills

Python 3 (ipykernel)

Lab: Week #6 | The Z Gate and Multi-Qubit Circuits

Description:

In this week's lab, we will create and simulate quantum circuits involving the Z gate, multi-qubit circuits, and multi-qubit gates.

Cheat Sheet: [Qiskit Cheat Sheet](#)

Part 0: Importing from Qiskit

Run the cell directly below before doing anything else. This will import all of the functions that we will use today.

```
[1]: # Importing standard Qiskit libraries
from qiskit import QuantumCircuit #Importing the QuantumCircuit function from Qiskit. We will use this to create our quantum circuits!

# We will use these functions to run our circuit and visualize its final state
from qiskit import Aer, execute
from qiskit.visualization import *

import warnings # We are using this library to suppress some warning messages
warnings.filterwarnings("ignore")

print("Libraries imported successfully!")
```

Libraries imported successfully!

Part 2: The Z Gate

Exercise #1

Together, let's create and draw a 1-qubit circuit with 1 Z gate.

```
[8]: qc = QuantumCircuit(1)
     qc.z(0)
     qc.draw()
```

[8]:

Exercise #2

Together, let's create and run a 1-qubit circuit with 1 Z gate using `visualize_transition` with `fpg = 5`.

```
[9]: qc = QuantumCircuit(1)
     qc.z(0)
     visualize_transition(qc, trace = True, fpg = 5)
```

No Kernel

Exercise #5

Create and draw a 5-qubit/5-classical bit quantum circuit where you apply the gates listed below using a loop and measure.

H gate on qubit 0

CX with qubit 0 as the control and qubit 1 as the target

H gate on qubit 1

CX with qubit 1 as the control and qubit 2 as the target

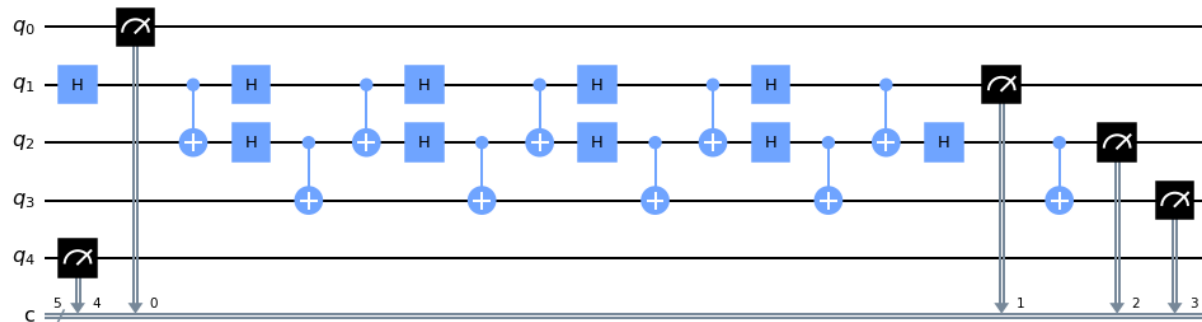

H gate on qubit 2

CX with qubit 2 as the control and qubit 3 as the target

NOTE: Be careful of going over the number of qubits in the loop.

```
[41]: qc = QuantumCircuit(5, 5)
      for qubit in range(5):
          qc.h(qubit)
          qc.cx(qubit, qubit+1)
      qc.measure([0, 1, 2, 3, 4], [0, 1, 2, 3, 4])
      qc.draw()
```

[41]:

Run the code below to simulate the measurement results using QASM.

```
[13]: # Simulate using QASM
      backend = Aer.get_backend('qasm_simulator')
      job = execute(qc, backend = backend, shots = 1024) # Make sure you change "qc" to the name of your quantum circuit in this line!
      result = job.result()
      counts = result.get_counts()
      plot_histogram(counts)
```

What is this really all about??

Quantum education & career pathways for you !!

Get involved with the Quantum World.

1. Take Action:

1. Go to my website, click on links and read articles
2. Watch YouTube videos on Quantum
3. Find hands-on workshops close to home
4. Take on-line courses
5. Got to a college that offers quantum courses
6. Take an internship that works in the field
7. Join a club or start one your self
8. Invite me back to help with next steps !!!

Hybrid curriculum for upskilling photonics technicians in advanced optics, spectroscopy and quantum research enabled technologies
